Foreword

Foreword by the Chairman of the Board of Directors

On behalf of the Recytyre Board of Directors, I am pleased to present our activity report for the year 2024. This year has been marked by both solid operational continuity and the emergence of promising opportunities for the future of the industry.

In 2024, Recytyre collected **92,596 tonnes of used tyres**, an increase of 6% compared to 2023. This growth was reflected in several product categories, notably passenger car tyres (+8%) and truck tyres (+4%). These results come at a time when the Belgian market has recorded an overall increase of **3%**, reaching **6.66 million units** (RE + OE).

The overall performance of the system remains high, with a collection rate equivalent to **89% of the market**, confirming the effectiveness of the model implemented. The operational network remains stable, with **4,936 active collection points**, ensuring effective and equitable national coverage. In addition, **100% of the collected tyres were recycled as raw materials**, reinforcing our commitment to a high-performance circular economy.

The year 2024 also saw significant development within the sector: the emergence of **several industrial projects for the pyrolysis of used tyres** in Belgium.

These advanced recycling technologies, capable of regenerating the basic components of tyres (oils, gases, carbon black), offer concrete prospects for moving towards higher value-added recovery models, both environmentally and economically.

Recytyre considers these initiatives to be strategic for the future of the sector. Recytyre will ensure their gradual integration into the existing contractual and logistical framework, in accordance with the principles of extended producer responsibility and the economic balance of the sector.

On behalf of the Board of Directors, I would like to express our gratitude to the Recytyre team for the quality of their work, as well as to all the public and private partners who contribute to the success of the scheme on a daily basis.

In a constantly changing environment, our ambition remains unchanged: to support the sector towards increasingly responsible, innovative and circular management of used tyres in Belgium.

Rainer Odenthal

Chairman of the Board of Directors

Environmental contribution by type of tyre

The environmental contribution is paid for each new tyre placed on the Belgian market. It is the only source of funding for the implementation of the used tyre take-back obligation. It is therefore not a tax, but the basis for funding a service to Recytyre members. It reflects the real cost of collecting and (pre-)treating used tyres in a sustainable way as part of the Recytyre system.

For more than 12 years, Recytyre has managed to keep these environmental contributions unchanged. In 2023, not only the structure but also the amounts of the environmental contributions have been adapted to the reality of the market.

For 2024, these contributions have remained unchanged.

Members per market

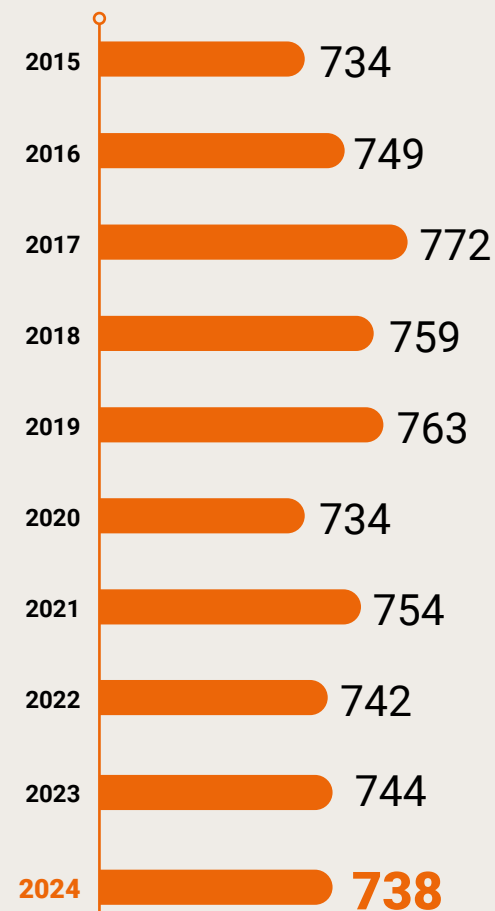

Active members on 31/12/2024

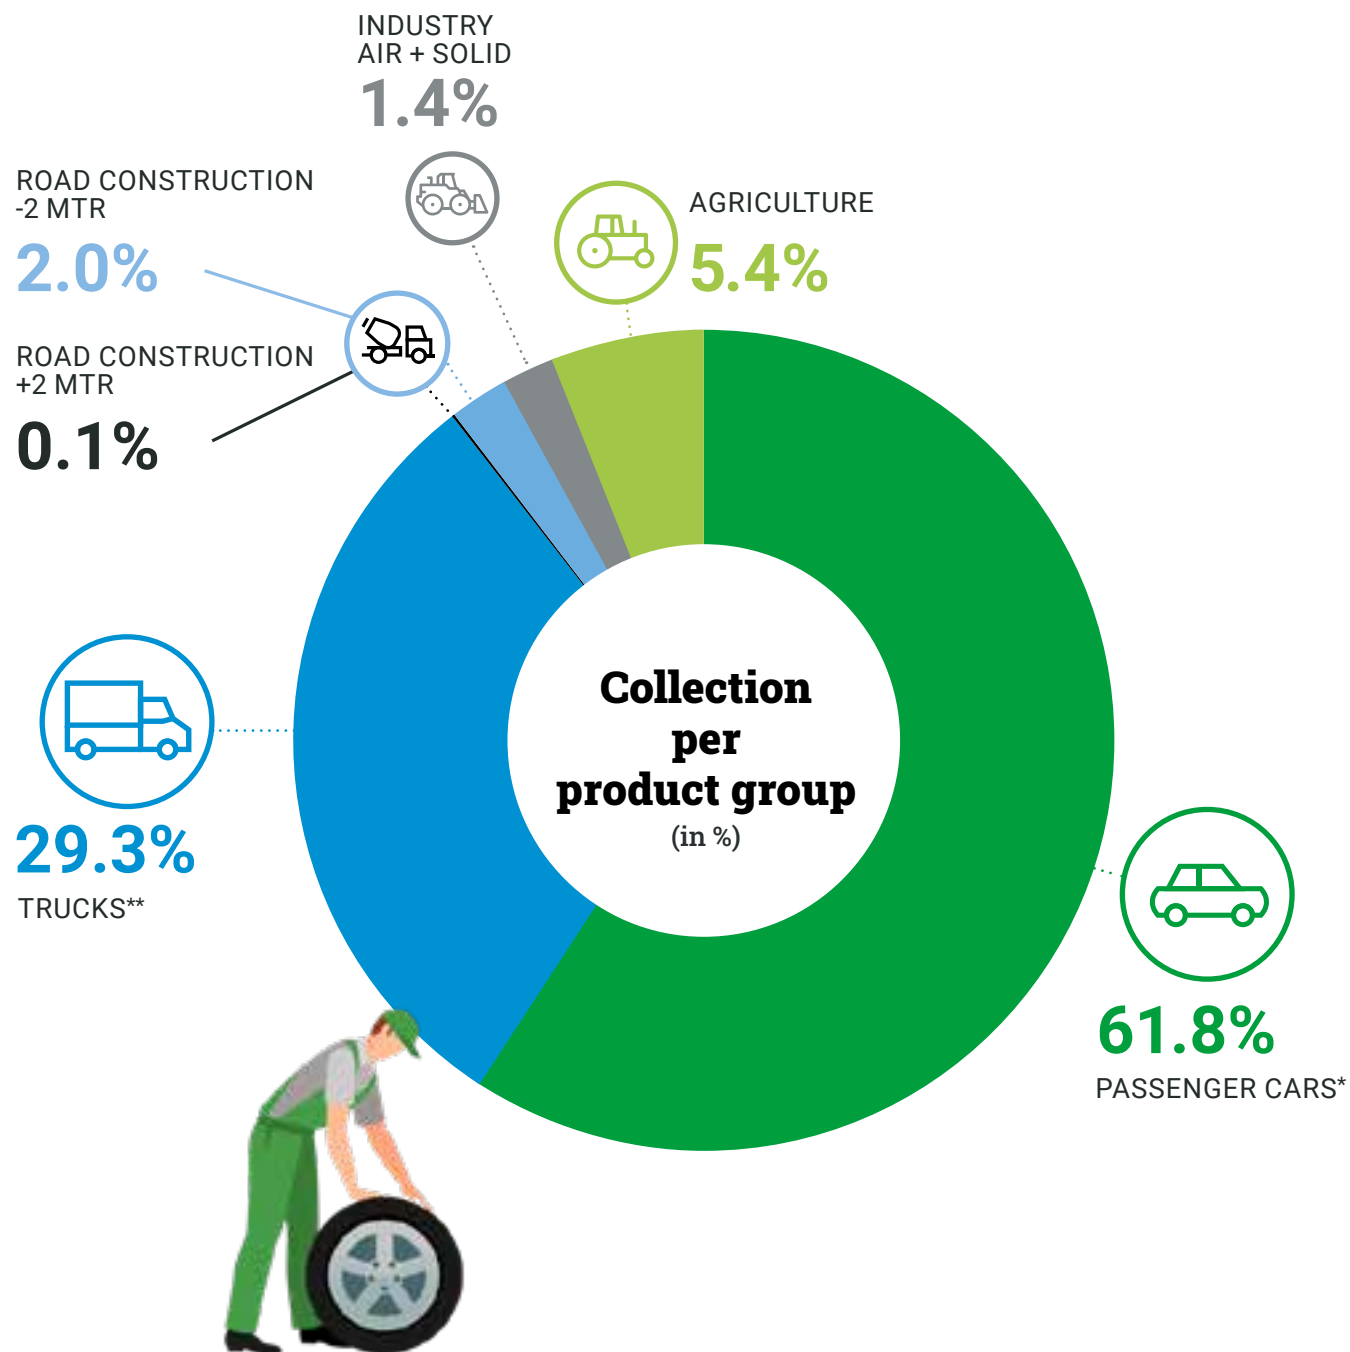

In 2024, 56 companies terminated their membership. In most cases, these were regroupings of companies, namely 26. In addition, there are 14 companies that no longer carry out import activities. The remaining terminations are mainly due to name changes in combination with a change of VAT number and during 2024 there were 50 new registrations activated.

D-CARBONIZE

FY24 results (offices)

Carbon footprint assessment

June 20th, 2025

Context of the assignment

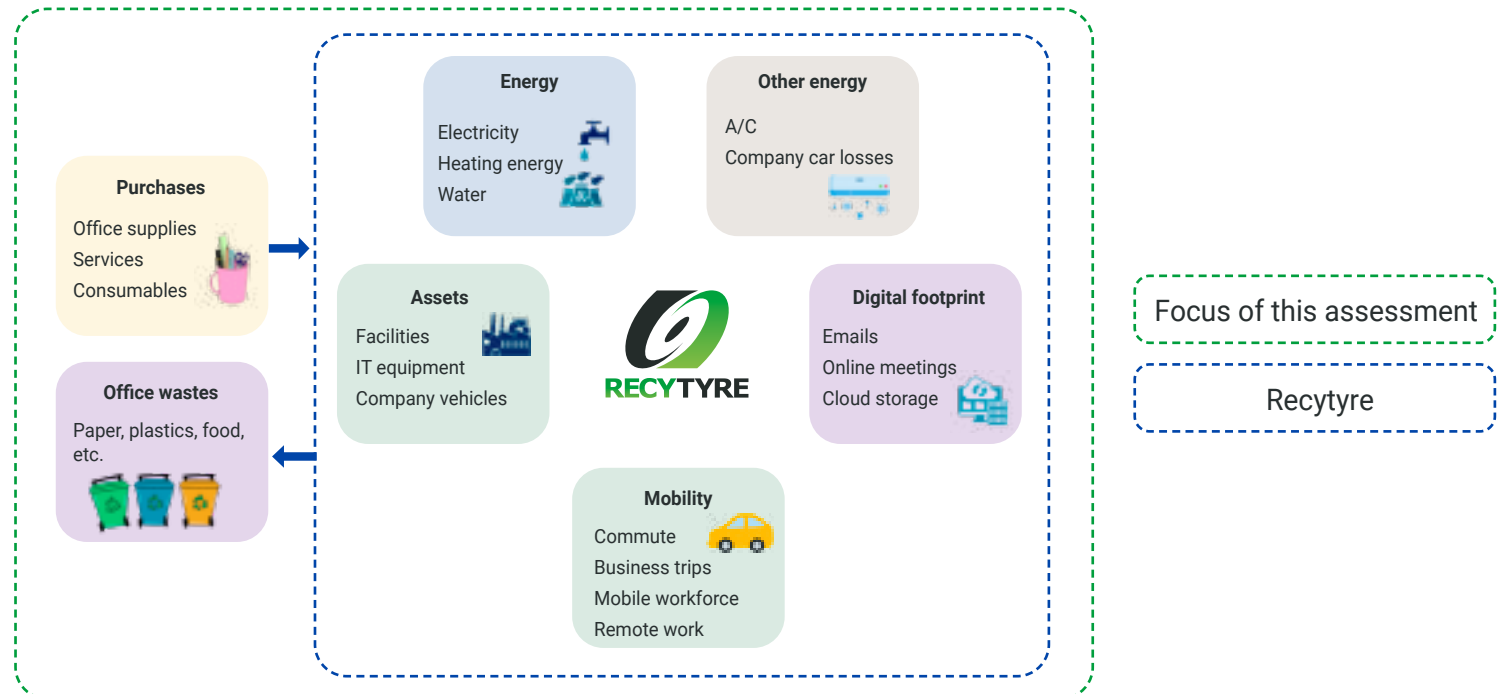

In 2023, D-Carbonize has been selected by Recytyre to support the company in addressing its strong environmental ambitions. Following an initial carbon footprint assessment of Recytyre's activities for FY2023, the development of a carbon roadmap to monitor reduction of emissions over time, and the delivery of various sustainability-related projects, D-Carbonize has measured the emissions associated with Recytyre's offices for FY24.

This report presents the results of the FY24 offices' emissions assessment, whose objectives are outlined below:

Phase 1 – Measure the carbon footprint of Recytyre's offices

- ▶ Scope 1, 2, and 3 emissions
- ▶ Compliant with the GHG Protocol
- ▶ For Recytyre's offices in FY24
- ▶ Custom and precise calculations with a low level of uncertainty
- ▶ Granular results to generate actionable insights about Recytyre's emissions

SCOPE – RECYTYRE'S OFFICES

DISCLAIMER

This report has been prepared by D-Carbonize to present the results of a carbon footprint project conducted for Recytyre. While D-Carbonize has taken diligent care to ensure the accuracy and reliability of the information contained in this report, the following disclaimers apply:

1. Data Accuracy

The precision of emissions data in this report depends on the quality and completeness of the information provided by Recytyre. Assumptions and estimates used during the assessment align with industry standards but are subject to inherent limitations, such as data availability, measurement precision, and variability in external factors.

2. Hypotheses and Assumptions

This report incorporates estimates and assumptions based on available information, scientific methodologies, and industry best practices. These assumptions may affect the reported outcomes and should be interpreted within the context of their limitations.

3. Scope and Boundaries

The results of this report are based on the specific scope, boundaries, and methodologies defined for this assessment. Any adjustments to these parameters, including changes in scope, methodologies, or boundary settings, may alter the results and affect their comparability with other reports.

4. Independence of Review

If Recytyre uses D-Carbonize's carbon accounting platform, Carbon Cockpit, to conduct its carbon footprint assessment, D-Carbonize cannot claim full independence when reviewing or auditing such assessments, including verification statements or similar audits. However, D-Carbonize ensures impartiality and adheres to applicable standards, industry best practices, and ethical guidelines to deliver high-quality and unbiased work.

5. Changes and Updates

This report reflects the conditions, data, and methodologies available at the time of preparation. Future developments, data revisions, or updates to methodologies may necessitate modifications. D-Carbonize does not undertake any obligation to update this report unless expressly required by contractual agreement.

6. Limitations of Use

This report is intended solely for Recytyre and provides general insights into the carbon footprint assessment. It is not designed to provide legal, financial, investment, or operational advice. Any decisions made based on this report are at the sole discretion and risk of the user. Independent professional advice should be sought for specific decisions.

7. Liability Disclaimer

To the maximum extent permitted by law, D-Carbonize and its agents, contractors, and affiliates:

Do not warrant the completeness, accuracy, or relevance of the information provided. Disclaim liability for any direct, indirect, incidental, or consequential damages, including but not limited to business interruptions, financial losses, or loss of goodwill, resulting from the use of this report.

8. Third-Party Use

Any third party accessing this report agrees that D-Carbonize is not liable for errors, omissions, or reliance placed on its content. D-Carbonize expressly disclaims responsibility for any decisions or actions taken based on this report by anyone other than Recytyre.

9. No Obligation to Update

D-Carbonize assumes no obligation to update the report to reflect subsequent developments, new data, or corrected inaccuracies unless explicitly agreed upon in writing.

10. Confidentiality

This report is confidential and intended for the exclusive use of Recytyre. Unauthorized distribution, reproduction, or reliance on this report by third parties is strictly prohibited without prior written consent from D-Carbonize.
